

SPEED UP!

With Aperio® V3

Wireless locks react in a heartbeat with the new V3 platform. For organizations looking to super-charge unlocking speeds, ASSA ABLOY's new generation of battery-powered locks pack more powerful electronics and guarantee faster response times. The boost in performance comes without sacrificing Aperio® class-leading energy efficiency. With wireless locks running the V3 platform, for example highly-frequented entrance doors still

run for two years on a standard battery, maintaining remote opening function with a heartbeat time of typically five seconds communication time between Aperio® lock and the access control system throughout the battery life. With a comprehensive lock range covering almost every door style and opening, there's no reason to delay upgrading to faster wireless access control with Aperio® V3.

Real-time

Heartbeat communication:
5-10 seconds

Speed

Remote door opening
functions

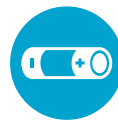

Multi credential

Supports multiple high
frequency RFID technologies
and Seos mobile access

Easy to update

Powerful new electronics
with USB interface

Cost-effective

Increased battery
performance
